

FLOW-TECH AIR PVT. LTD.

AUGMENT PROGRAM

A TURNKEY MAINTENANCE SOLUTION FOR YOUR COOLING TOWERS

Program overview

The performance efficiency and long life of your cooling tower is directly related to the attention it gets. With the AUGMENT program, Flow-Tech Air can provide the services needed to take care of your FRP cooling towers, irrespective of manufacturing date, model or manufacturer. With over 25 years of experience, Flow Tech Air has dedicated service teams that can perform initial inspections and provide preventive maintenance solutions over every aspect of your cooling tower.

Program Details

INITIAL INSPECTION

The AUGMENT program service begins with a complete CT inspection. We concentrate on:
Structural stability • Mechanical equipments • Distribution system • Fill • Eliminator • Fan assembly
• Hardware • Leakage issues.

A detailed inspection report will follow every inspection to summarise our findings and communicate any recommendations for improved performance or reliability, as well as provide you with a long-term plan focused on how to protect your cooling tower in the future, with the goal of maximising the life of the cooling tower and minimising future costs.

TURNKEY MAINTENANCE

A dedicated care approach will pay dividends in the future in terms of reduced downtime, lower risk of emergencies and an extended life of components such as fills, eliminators and fans. Flow-Tech Air specializes in all the basic maintenance activities which include:

Fan blade adjustments • Replacing normal wear items • OEM spares at preferred rates.

THE FLOW TECH AIR DIFFERENCE

The Flow Tech Air AUGMENT program provides various advantages:

OEM technical know-how and industry experience – over two and a half decades of excellence. Dedicated Cooling tower service specialists carry out the work. Focus on enhanced thermal performance and reduced downtimes as the ultimate goal. Tailor-made program sub divisions as per Client's particular requirements.

With these strong set of capabilities, Flow Tech Air can be your dedicated asset manager for cooling tower related turnkey solutions.

AUGMENT PROGRAM +PLUS

In the AUGMENT program +PLUS, we offer services that provide easy monitoring of all the maintenance/repair work being done on your cooling towers. We create a custom database that can store important information for your cooling towers. For example age and condition of particular components, inspection records, maintenance history, and performance. This service provides a transparent system, where we at Flow Tech Air can help in forecasting future budget requirements in order to extend the life of your cooling towers.

SERVICES OFFERED WITHIN THE PROGRAM

THOROUGH TOWER INSPECTION • FAN BLADE ADJUSTMENTS • REPLACING NORMAL WEAR ITEMS • OEM SPARES AT PREFERRED RATES • PERIODICAL OVERHAULING OF TOWER • CLEANING OF FILLS • REPAIRING MINOR CRACKS • FIXING LEAKAGE ISSUES • TOWER WATER TREATMENT • MONTHLY MAINTENANCE REPORT
